AUNG AUNG

Senior Ruby on Rails Developer | Production Systems, APIs & Technical Ownership

Bangkok, Thailand | Open to Relocation Worldwide | +66 62 846 1090 | aung.aung.ycc@gmail.com | github.com/aung-aung-scg | linkedin.com/in/aung-aung-ror-developer | Available with one month's notice

PROFESSIONAL SUMMARY

Senior Ruby on Rails Developer with 9+ years of backend and full-stack web development experience, including approximately eight years building, maintaining, and leading production Rails systems at Softguide Software House. Owns projects from requirements clarification and technical design through implementation, automated testing, deployment, production support, and maintenance, with strengths in Rails 4-to-7 modernization, REST APIs, MySQL and SQL optimization, CI/CD, production troubleshooting, technical documentation, code review, mentoring, and collaboration with business stakeholders and international engineering teams. Reduced query load time on 1M-row datasets from approximately 2 minutes to 30 seconds through SQL optimization and query refactoring, with complementary Node.js backend experience and a clear focus on production Ruby on Rails development.

TECHNICAL SKILLS

- **Ruby & Rails:** Ruby, Ruby on Rails, Rails architecture, legacy modernization, refactoring, REST APIs, business logic
- **Testing & Quality:** RSpec, MiniTest, automated testing, regression testing, code review
- **Databases:** MySQL, SQL optimization, database design, migrations, data access
- **APIs & Integrations:** RESTful APIs, webhooks, third-party APIs, ChatGPT API, Slack integrations
- **Deployment & Operations:** AWS, CircleCI, Ansible, Docker, Linux/Unix, CI/CD, New Relic, production troubleshooting
- **Engineering & Leadership:** requirements clarification, technical design, architecture, technical documentation, mentoring, release management, Agile collaboration, GitHub pull requests
- **Additional technologies:** Node.js, Express, TypeScript, JavaScript, React, Next.js, React Native, Expo, Tailwind CSS, Bootstrap, SCSS, CoffeeScript, ERB, HTML/CSS

PROFESSIONAL EXPERIENCE

Lead Full-Stack Engineer | Astranokta

Contract | May 2026 – Present

- **Own** backend-focused development of a social investing platform across web and mobile applications.
- **Translate** requirements into technical designs and develop Node.js backend services and REST APIs supporting application workflows and data access.
- **Establish** QA, release management, and CI/CD processes while driving production readiness and managing technical risks for MVP execution.
- **Review** GitHub pull requests, mentor 2 junior developers, and coordinate frontend and backend development across a small engineering team.
- **Collaborate** with founders and stakeholders in an English-first remote engineering environment to clarify requirements and remove technical risks.

Lead Developer (Myanmar Team) | Softguide Software House

Senior Ruby on Rails / DevOps Engineer; Lead Developer for the Myanmar team from 2020 | Jan 2018 – Apr 2026

- **Led** 5–8 developers, mentoring engineers and guiding Rails architecture, engineering standards, code quality, development practices, and delivery.
- **Architected and maintained** Ruby on Rails backend systems using established Rails conventions across business logic, REST APIs, database operations, data access, and third-party integrations.
- **Maintained and progressively modernized** the existing Manabeat LMS, including its migration from Rails 4 to Rails 7.

- **Designed and optimized** MySQL queries, migrations, schema and data structures for large datasets.
- **Reduced** query load time on 1M-row datasets from approximately 2 minutes to 30 seconds through SQL optimization and query refactoring.
- **Expanded** MiniTest coverage across models, concerns, and controllers to support the Rails migration, regression testing, and long-term maintainability.
- **Refactored** application code and established automated and regression-testing practices with MiniTest.
- **Owned** AWS deployments and CI/CD pipelines using CircleCI and Ansible.
- **Investigated and resolved** production issues using New Relic monitoring and production troubleshooting practices.
- **Contributed** to architecture discussions, code reviews, technical decision-making, technical documentation, refactoring, and engineering standards.
- **Collaborated** with Japanese engineering teams to clarify requirements, estimate work, resolve issues, and deliver features from development through production.
- **Implemented** internationalization across English, Japanese, Simplified Chinese, and Traditional Chinese, and designed an IP-based access-control system for exam integrity.

Senior Ruby on Rails / Full Stack Engineer | X.inc

Remote, part-time, concurrent with Softguide Software House | Apr 2023 – Apr 2024

- **Owned** AICMS as the sole engineer, from requirements clarification and technical design through implementation, testing, deployment, and maintenance.
- **Developed** the Ruby on Rails backend API and TypeScript/Express application functionality connecting frontend and backend layers.
- **Designed** RESTful API functionality and integrations with ChatGPT and Slack REST APIs.
- **Translated** business requirements into technical solutions while working directly with a remote Product Owner and delivering features end-to-end.
- **Implemented** automated and regression testing with RSpec and owned the application lifecycle through deployment.

Junior Java Developer | Frobom Myanmar Inc

Jan 2017 – Dec 2017

- **Developed** Java web applications and designed frontend interfaces using Bootstrap and CSS.
- **Built** foundational backend experience through SQL, Linux/Unix administration, and object-oriented programming.
- **Studied** Ruby and obtained a Ruby programming certification while developing basic Japanese communication skills in a Japanese-oriented environment.

EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Science** — University of Technology (Yadanarpon Cyber City), 2016
- **Ruby Association Certified Ruby Programmer**
- **Java EE (Spring MVC) Certification**
