PROFESSIONAL SUMMARY

- Senior Ruby on Rails developer with 8+ years of Rails experience (Ruby Association Certified Ruby Programmer), plus full-stack work in TypeScript/Node.js and React. 9+ years in software overall.
- Built and maintained server-side rendered Rails applications at scale: an LMS with about 100 paid sites and over 1 million users, upgraded from Rails 4 to Rails 7 with full MiniTest coverage of models, concerns and controllers.
- Performance-minded: profiled with New Relic and optimised MySQL schemas and queries, cutting 1M-row load time from about 2 minutes to 30 seconds. Experienced with Sidekiq, Redis, Docker and AWS.
- Led and mentored teams of 5-8 developers: wrote estimates, delegated tasks, ran code reviews and reported progress directly to product owners and shareholders in English.

TECHNICAL SKILLS

Ruby & Rails: Ruby, Ruby on Rails (4 to 7, upgrade lead), ActiveRecord, concerns, Devise, CanCanCan, Sidekiq, REST APIs, server-side rendered apps, RSpec, MiniTest
Databases: PostgreSQL, MySQL, Redis, Supabase; schema design, migrations, query optimisation
Frontend: JavaScript, TypeScript, HTML5, CSS3/SCSS, responsive design, React, Next.js, Tailwind CSS, Bootstrap
Other backend: Node.js, Express, TypeScript, Java (Spring), PHP (certified)
Cloud & delivery: AWS, Docker, Heroku, Ansible, Linux/Unix, CircleCI, New Relic, feature-flag releases, testing-site-to-production workflows
Practice: Git/GitHub (pull requests, code review), Postman, Agile, Backlog, estimation, technical documentation, unit and regression testing (also Jest, node:test)
Integrations: Stripe, OpenAI/ChatGPT API, Slack API, Binance price data, Unsplash API

PROFESSIONAL EXPERIENCE

Lead Developer (Myanmar Team) — Softguide Software House

Jan 2018 – Apr 2026 • Senior Ruby on Rails / DevOps Engineer; Lead Developer for the Myanmar team from 2020

- Led the Myanmar side of Manabeat, a Rails LMS with about 100 paid sites and over 1 million users, working remotely with a Japanese engineering team.
- Upgraded Manabeat from Rails 4 to Rails 7 and added MiniTest coverage for every model, concern and controller.
- Optimised MySQL schemas, migrations and queries, cutting load time for 1M-row datasets from about 2 minutes to 30 seconds; profiled with New Relic to find bottlenecks.
- Used Sidekiq for scheduled notifications and email batches of about 1,000 mails per request; enforced per-site media-upload limits with Redis and built a reporting dashboard.
- Designed IP-based access control to protect exam integrity; built React-based exam-material creation inside the Rails app.
- Built a Rails attendance system with payments and certificates (on Heroku) and a small Rails point-of-sale system.
- Supported AWS deployments and releases with Docker, Ansible and CircleCI; implemented internationalisation in English, Japanese, Simplified and Traditional Chinese.
- Led and mentored 5-8 developers, wrote estimates, assigned work, documented every change with screenshots, and worked from specifications on GitHub and Backlog.

Lead Full-Stack Engineer — Astranokta

Contract, remote • May 2026 – Aug 2026 (contract completed)

- Led engineering for a social-investing platform: Next.js web app, React Native/Expo Android app and a Node.js backend on Supabase PostgreSQL.
- Delivered Stripe payments, copy trading, signal management and live Binance prices.
- Owned the CircleCI pipeline, wrote automated tests (node:test, Jest + ts-jest), reviewed all pull requests and mentored 2 junior developers.
- Released through a testing site and production feature flags; communicated directly with shareholders on scope, progress and delivery.

Senior Full-Stack Engineer — X.inc

Remote, part-time, concurrent with Softguide • Apr 2023 – Apr 2024

- Sole engineer on AICMS: designed the PostgreSQL schema and built the Rails API with TypeScript/Express services behind a Next.js frontend, integrated with the OpenAI/ChatGPT API, with role management.
- Built a rental-room search and moving platform (React.js frontend, Rails API) that scraped external listings and matched images via the Unsplash API.
- Integrated ChatGPT and Slack REST APIs, wrote RSpec automated and regression tests, and deployed with Docker on AWS.

Junior Java Developer — Frobom Myanmar Inc

Jan 2017 – Dec 2017

- Built a company-internal attendance system with Java Spring and the user interface for a job-search platform with Bootstrap, HTML and CSS.

EDUCATION & CERTIFICATIONS

- Bachelor of Computer Science (B.E., IST) — University of Technology (Yadanarpon Cyber City), 2016
- Ruby Association Certified Ruby Programmer; Java EE (Spring MVC) and PHP certifications
- Japanese: NAT-TEST N3 (April 2026)
