PROFESSIONAL SUMMARY

Full-stack developer with 9+ years building web applications with React, Next.js, Node.js and SQL databases (PostgreSQL, MySQL). Led teams of 5-8 developers and shipped products used by over 1 million users. Experienced working with Japanese managers and teams in English and Japanese, mainly in writing.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native / Expo, TypeScript, JavaScript, HTML/CSS

Backend: Node.js, Ruby on Rails, Java Spring, REST APIs, Sidekiq

Databases: PostgreSQL, MySQL, Supabase, Redis

DevOps: AWS, Docker, CircleCI, Ansible, Heroku, GitHub, Backlog

Testing: node:test, Jest, RSpec, MiniTest, Postman

EDUCATION

Bachelor of Engineering (B.E.)
Information Science and Technology
University of Technology (Yadanarpon Cyber City)
Graduated: 2017

CERTIFICATIONS

Ruby Association Certified Ruby Programmer
Java EE (Spring MVC)

LANGUAGES

English: professional working language
Japanese: NAT-TEST 3Q (JLPT N3 equivalent)
Apr 2026, written communication

WORK EXPERIENCE

Lead Full-Stack Engineer and Team Lead

Astranokta | May 2026–Aug 2026 | Contract

• Built a full-stack social-investing platform: Next.js web, React Native / Expo Android, Node.js back end and Supabase PostgreSQL.
• Delivered Stripe payments, copy trading, signal CRUD and live Binance prices.
• Led two junior developers; owned the CircleCI pipeline and code reviews before squash-merging.
• Wrote node:test for the Node.js back end and Next.js web, and Jest for the mobile app.
• Released through testing, then production behind feature flags.
• Worked in English with an international team and reported directly to the founder and shareholders.

Full-Stack Developer

X.inc | Apr 2023–Apr 2024 | Part-time

• Sole engineer on AICMS: Next.js/TypeScript front end with OpenAI content CRUD and role CRUD over a Rails API and PostgreSQL.
• Designed the database schema and built a listing scraper with Unsplash images.
• Built a React rental-room search and moving platform with Rails API and Docker on AWS.
• Performed REST API testing using Postman.

Developer, then Lead Developer (from 2020)

Softguide Software House | Jan 2018–Apr 2026

• Led Manabeat LMS serving about 100 paid sites and over 1 million users across English, Japanese, Chinese ZH-CN and ZH-TW.
• Led and mentored 5–8 developers; ran delivery with GitHub, Backlog and CircleCI.
• Led the Rails 4 to Rails 7 upgrade and added MiniTest coverage for every model, concern and controller.
• Added React to the Rails app for exam-material creation.
• Wrote estimates and held weekly reviews and technical discussions with the Japan-side PM and senior leaders, in Japanese and English.
• Cut a 1-million-row MySQL load from about 2 minutes to about 30 seconds; used Redis for media-upload limits and Sidekiq for scheduled notifications and email batches.
• Built two attendance apps and a small POS, deployed on Heroku.

Developer

Frobom Myanmar | Jan 2017–Dec 2017

• Built an internal attendance system with Java Spring / Spring MVC, including database development.
• Developed the UI for the Smartalote job-search platform.
